

Suggested Schedule

15-20 minutes for Math

15-20 minutes for Reading

15-20 minutes for Writing

Directions: Have your child choose at least one activity to complete from each choice board each day. Please understand that these are only suggestions and you can spend more time if needed. We recommend starting with the least desired activity first and working toward the activity they want to do most. Below are other options for setting up a routine for your day:

- You can do all of the activities in the morning and get them done.
- You can spread them out when you have time throughout the day.
- You could do them all in the afternoon or evening.

This is very flexible to fit your needs, and we want them to review skills we have learned so far. Please fill out the [activity log](#) to keep track of the activities you have worked on each day. If you click on the blue links or words throughout this entire document it will take you to a folder filled with all the extra resources or the website you will need for remote learning. There are also some paper and pencil options for you to print in this online folder if desired. The counselor has also provided some information on how to talk to your child about [COVID-19](#). Click on [COVID-19](#) to go to her document and all other documents needed. If you have any questions, please don't hesitate to contact your child's teacher.

At Home Learning Choice Board: Math

Pick at least one activity per day. Spend at least 15 minutes on each activity.

Count to 120 by 1s, 5s, or 10s. Have them practice writing the numbers as they count.

Use crackers or a snack to create a math story problem.

Example: Sam has 10 goldfish. His mom gives him 4 more. How many goldfish does he have in all?
OR
Sam has 10 goldfish and he eats 2. How many goldfish does he have left?

Practice addition facts on flashcards.

*Click [here](#) for flashcards.

Play "Double Compare" with playing cards.

Directions: This is just like the game of "War" where you and a partner flip over 2 cards instead of 1 and add your 2 cards together. The person with the largest sum (total) wins all the cards. You can also do subtraction.

Make a graph using cans in your pantry.

Ask the following questions: Which canned good do you have the most of? Which do you have the least of? How many more ___ do you have than ___?

Practice subtraction facts on flashcards.

*Click [here](#) for flashcards.

Have a family member pick numbers between 1 and 120. Draw a model to show how many tens and ones are in their numbers.

Example:
53 has 5 tens and 3 ones.

Have a family member pick numbers between 11 and 110. Tell them the number that is 10 more and 10 less.

Example:
 $24+10=34$
 $24-10=14$

Use water bottles, cans, or markers (any object of the same size) to measure 5 things in your house.

Example: My bed is __ water bottles long.

Play math games at www.abcya.com

Have a family member pick 4 numbers between 1-120. Put them in order from smallest to largest.

Example: 23, 49, 10, 75 would be 10, 23, 49, 75

Play a math game at the Pearson Game Center.
